

CPRi and Armoured Patch Cords

FEATURES

- Manufactured by Armored optical cable,flexible metal tube protect the fiber optics ◀
- High press resistant strength, stamp resistant & anti bite of rat and monkey ◀
- Small diameter, bend resistant & optimum ◀
- Aramid yam reinforced optical cables has superior elongate resistant .secured & reliable when connect it with fiber optic connector ◀
- Can put directly at various environment indoor, no need fo r using protection conduct ◀
- Convenient for network operation maintenance ◀
- Available in both SM & MM and Length can be customized ◀

APPLICATIONS

- Gigabit Ethernet
- Telecommunication Networks
- Connection between RRU to BBU
- Actve Video Device Termination
- Premise Installations
- Widely used in FTTA & FTTH
- Harsh outdoor environments application
