

FEATURES

- Adapter & Attenuator ◀
- Adopter with low Insertion loss ◀
- Improved re-convertibility ◀
- High precision alignment sleeves ◀
- Available for single-mode & multi-mode connections in simplex and duplex versions ◀
- Attenuators temporarily adding a calibrated amount of signal loss ◀
- Attenuators installed permanently to properly match transmitter and receiver levels ◀

APPLICATIONS

- Adapter & Attenuator
- CATV
- Single-mode assemblies data communications and wide area network (WAN) applications
- Multi-mode assemblies are designed for use in data communications and local area network (LAN)
- All types of FMS. SDH. DWDM, etc
- For Variable Attenuation Control
- Fast Connector
- Test Equipment, Optic FiberSensor
- CATV,LAN. Access Network

- Fast Connector ◀
- Low Insertion Loss,Ready to use ◀
- High Temperature Stability
